

# Chemicals

<b>Responsible</b>	TBD
<b>Chemical Database</b>	TBD

For each of the chemicals we use in the lab, a safety data sheet (SDS) or similar should be available electronically on this wiki.

If a new chemical is added make sure that:

- the name of the chemical, your name and day of expiration is somehow indicated on the container/box/package/bottle
- the chemical can be stored together with the other chemicals and under the conditions present in our lab
- you provide the SDS or similar electronically on this wiki.

The chemicals in the storage are:

Name	Description	Detailed information	Responsible
<b>Room 0.10</b>			
		<a href="#">SDS</a>	
<b>Room 1.25</b>			
		<a href="#">SDS</a>
